Executive Summary

The AICTE institutional report for the 2025-2026 academic period indicates a total of three recorded activities across six monitored modules. The data reflects a period of limited activity, with specific achievements noted in placements, student accomplishments, and faculty recognition. Notably, the Computer Engineering department emerged as the primary contributor to these metrics, accounting for two of the three total records. While the institution successfully secured one placement with TCS and recorded one technical student achievement and one research-based faculty achievement, there was a notable absence of activity in the areas of internships, publications, and patents during this reporting cycle. Compared to the previous period, where internships, publications, and patents each recorded one entry, the current cycle shows a decline in these specific research and experiential learning categories. Conversely, placements, student achievements, and faculty achievements each demonstrated a 100% growth rate relative to the previous period, where no records were logged for these specific categories. The institution maintains a baseline of engagement, yet the data suggests a need for strategic focus to revitalize research output and internship participation to align with broader accreditation standards.

Key Highlights

- Total records: 3
- Placements: 1
- Student Achievements: 1
- Faculty Achievements: 1
- Internships: 0
- Publications: 0
- Patents: 0
- Top performing department: Computer Engineering (2 records)
- Growth in placements: 100%
- Growth in faculty achievements: 100%

Charts

No event photographs were available for the selected report scope.

Recommendations

- Implement a structured tracking mechanism to increase the volume of reported internships.
- Develop a faculty incentive program to encourage the submission of research publications and patent applications.
- Investigate the decline in research-related outputs to identify potential barriers to faculty and student participation.
- Expand placement and internship outreach beyond the Computer Engineering department to ensure balanced institutional performance.
- Conduct a review of data entry processes to ensure all departmental achievements are captured comprehensively.

Appendix

Report Type: AICTE Report

Department: All Departments

AI Summary Source: gemini

Sections: cover, table-of-contents, executive-summary, key-highlights, charts, statistics, tables, images, recommendations, appendix

Institutional Strengths

- Successful placement of a student in TCS within the Computer Engineering department.
- One documented technical achievement by a student in the Computer Engineering department.
- One documented research achievement by faculty member Dr. Sharma.
- Positive growth trend in placements, student achievements, and faculty achievements compared to the previous period.

Observations

- Zero records were reported for internships, publications, and patents during the 2025-2026 period.
- The Computer Engineering department is the sole department with recorded activity in placements and student achievements.
- There is a 100% growth in placements, student achievements, and faculty achievements compared to the previous period.
- There is a 100% decline in internships, publications, and patents compared to the previous period.
- Total institutional records for the period remain low at three entries.
