Executive Summary

The institutional performance report for the 2025-2026 academic year, conducted under NAAC accreditation standards, indicates a total of three recorded activities across seven monitored modules. The institution observed a 25% decline in overall record volume compared to the previous reporting period. Data analysis reveals that while specific areas such as placements, student achievements, and faculty achievements demonstrated a 100% growth rate relative to the prior period, other critical metrics including internships, publications, patents, and completed event reports recorded zero activity for the 2025-2026 cycle. The Computer Engineering department emerged as the primary contributor to the recorded data, accounting for two of the three total entries. Institutional engagement is currently concentrated in isolated instances of placement, technical student achievement, and research-based faculty recognition. The absence of data in research-output categories, such as publications and patents, alongside the lack of completed event reports, suggests a significant contraction in documented institutional activities compared to the 2024-2025 period. Strategic focus is required to revitalize reporting mechanisms and ensure consistent documentation across all accreditation-relevant modules.

Key Highlights

- Total records: 3
- Overall growth: -25%
- Placement records: 1
- Student achievement records: 1
- Faculty achievement records: 1
- Internship records: 0
- Publication records: 0
- Patent records: 0
- Completed event reports: 0
- Top performing department: Computer Engineering

Charts

The following charts are rendered from aggregated institutional analytics data.

Event Images

No event photographs were available for the selected report scope.

Recommendations

- Implement a centralized tracking system to ensure all departments report internships and event completions.
- Establish a formal review process to capture research publications and patent filings as they occur.
- Investigate the cause of the 100% decline in internship and publication reporting compared to the 2024-2025 period.
- Encourage inter-departmental reporting to diversify data beyond the Computer Engineering department.
- Standardize the documentation workflow for faculty research achievements to ensure consistent data entry.
- Conduct a gap analysis to identify barriers to reporting in the four modules that recorded zero activity.

Appendix

Report Type: NAAC Report

Sections: cover, table-of-contents, executive-summary, key-highlights, charts, statistics, tables, images, recommendations, appendix

Institutional Strengths

- 100% growth in placement records compared to the previous period.
- 100% growth in student achievement records.
- 100% growth in faculty achievement records.
- Active engagement in the Computer Engineering department with 2 total records.
- Successful placement record documented with TCS.
- Documented faculty achievement in the research category.

Observations

- Total institutional records decreased by 25% year-over-year.
- Zero records were reported for internships, publications, patents, and completed event reports.
- All positive growth modules (placements, student achievements, faculty achievements) started from a baseline of zero in the previous period.
- The Computer Engineering department is the only department with recorded activity.
- Reporting activity is highly concentrated in the first quarter of the academic year (June-August 2025).
- There is a complete absence of research output documentation for the current period.
