Executive Summary

The NBA accreditation report for the 2025-2026 academic period indicates a total of three recorded institutional activities across seven monitored modules. The data reflects a 25% decline in overall record volume compared to the previous reporting period. Current activity is concentrated within the Computer Engineering department, which accounts for two of the three total records. Specifically, the institution recorded one placement in the Computer Engineering department with TCS, one technical student achievement, and one faculty research achievement. Notably, there were no recorded activities for internships, publications, patents, or completed event reports during this period, representing a 100% decrease in these specific categories compared to the 2024-2025 cycle. While individual modules such as placements, student achievements, and faculty achievements demonstrated positive growth relative to the previous period, the overall institutional output remains limited. The absence of research-related outputs, such as publications and patents, alongside the lack of internship data, suggests a need for improved documentation and reporting processes to align with NBA accreditation standards.

Key Highlights

- Total records: 3
- Overall growth: -25%
- Placements: 1
- Student Achievements: 1
- Faculty Achievements: 1
- Internships: 0
- Publications: 0
- Patents: 0
- Completed Event Reports: 0
- Top performing department: Computer Engineering

Event Images

No event photographs were available for the selected report scope.

Recommendations

- Implement a centralized data collection mechanism to ensure all faculty publications and patents are captured.
- Review departmental reporting workflows to address the absence of internship data.
- Establish a formal process for documenting and archiving event reports to ensure institutional activity is accurately reflected.
- Investigate the decline in research-related outputs to identify potential barriers to faculty publication.
- Standardize data entry procedures across all departments to improve the consistency of accreditation reporting.

Appendix

Sections: cover, table-of-contents, executive-summary, key-highlights, charts, statistics, tables, images, recommendations, appendix

Institutional Strengths

- Successful placement of a student in the Computer Engineering department with TCS.
- Documented technical achievement by a student in the Computer Engineering department.
- Recorded faculty achievement in the research category.
- Positive growth observed in the placements, student achievements, and faculty achievements modules.

Observations

- Total institutional records for the period stand at three.
- Overall record volume decreased by 25% compared to the previous academic year.
- Zero records were reported for internships, publications, patents, and completed event reports.
- Computer Engineering is the primary department contributing to the reported metrics.
- All reported activities occurred between June 2025 and August 2025.
- There is a 100% decline in output for four of the seven tracked modules.
