Executive Summary

The NBA accreditation report for the 2025-2026 academic period indicates a total of 3 recorded activities across seven monitored modules. The institutional performance reflects a 25% decline in overall record volume compared to the previous reporting cycle. Data analysis reveals that activity is concentrated within the Computer Engineering department, which accounts for two of the three total records. Specifically, the institution successfully documented one placement record within the Computer Engineering department, one student achievement in a technical category, and one faculty achievement in the research category. Conversely, several key performance indicators, including internships, publications, patents, and completed event reports, recorded zero activity for the current period, representing a 100% decline in these specific areas relative to the 2024-2025 academic year. While individual achievements in placement and research demonstrate localized success, the overall institutional output across the evaluated accreditation modules remains limited. Addressing the absence of data in research-oriented modules such as publications and patents is essential for meeting comprehensive NBA accreditation standards.

Key Highlights

- Total records: 3
- Overall growth: -25%
- Placements: 1 record
- Student Achievements: 1 record
- Faculty Achievements: 1 record
- Internships: 0 records
- Publications: 0 records
- Patents: 0 records
- Completed Event Reports: 0 records
- Top performing department: Computer Engineering

Charts

The following charts are rendered from aggregated institutional analytics data.

Event Images

No event photographs were available for the selected report scope.

Recommendations

- Implement a centralized tracking system to ensure all faculty publications and patents are captured.
- Develop a strategy to revitalize internship programs to reverse the current zero-record trend.
- Increase institutional support for research activities to improve publication and patent output.
- Standardize the submission process for event reports to ensure comprehensive documentation for accreditation purposes.
- Conduct a departmental review to identify barriers to reporting in non-Computer Engineering disciplines.

Sections: cover, table-of-contents, executive-summary, key-highlights, charts, statistics, tables, images, recommendations, appendix

Institutional Strengths

- Successful placement of a student in the Computer Engineering department at TCS.
- Documented student achievement in a technical category within Computer Engineering.
- Faculty achievement recorded in the research category.
- Positive growth observed in Placements, Student Achievements, and Faculty Achievements modules.

Observations

- Total institutional records decreased by 25% compared to the previous period.
- Zero records were reported for internships, publications, patents, and completed event reports.
- Computer Engineering is the primary department contributing to the reported metrics.
- All recorded activities occurred between June 2025 and August 2025.
- There is a 100% decline in output for four out of seven tracked modules.
