Executive Summary

The Patent Report for the 2025-2026 academic period indicates a total of zero patent records filed or granted within the institution. This represents a complete cessation of patent activity compared to the previous reporting period of 2024-2025, which recorded one patent filing. Consequently, the institutional growth percentage for patent output is -100%. There are no departmental breakdowns, category distributions, or top-performing contributors to report, as no patent-related data was captured during the current cycle. The absence of activity across all monitored modules suggests a significant decline in intellectual property development and formal patent filing processes during this timeframe.

Key Highlights

- 0 total patent records for 2025-2026.
- -100% growth in patent output compared to 2024-2025.
- 1 patent record was recorded in the previous reporting period.

Recommendations

- Conduct an internal audit to determine if patent filings were completed but not captured in the reporting system.
- Evaluate institutional support mechanisms for faculty and researchers to encourage intellectual property development.
- Review the current patent filing pipeline to identify potential barriers to submission.
- Establish a tracking mechanism to ensure all research outputs with commercial potential are documented.
