Department of Artificial Intelligence & Machine Learning (AIML)

Workshop Report on Generative AI and Large Language Models

Event Details :

Title of the Event: Generative AI & Large Language Models

Organized By: Department of AIML, D. Y. Patil College of Engineering and Technology

Resource Person: Information was not available in the provided WhatsApp conversation or uploaded documents.

Head of Department: Information was not available in the provided WhatsApp conversation or uploaded documents.

Venue: D. Y. Patil College of Engineering and Technology, Kolhapur, Maharashtra

Date: 8 August 2026

Time: Information was not available in the provided WhatsApp conversation or uploaded documents.

Participants: AIML Students

Introduction

The Department of Artificial Intelligence & Machine Learning (AIML) at D. Y. Patil College of Engineering and Technology organized a one-day workshop on 'Generative AI and Large Language Models' to provide students with practical exposure to the latest advancements in the field of AI.

This workshop was aimed at bridging the gap between academic theory and industry-standard AI practices, focusing on the transformative potential of Generative AI.

Objectives

The objectives of the workshop were:

1. To provide students with practical exposure to emerging AI technologies.

2. To build a foundational understanding of Generative AI and Large Language Models (LLMs).

3. To introduce students to the principles and applications of Prompt Engineering.

4. To encourage students to explore and develop innovative AI-based solutions.

Workshop Proceedings

The workshop commenced with an overview of the current AI landscape, setting the stage for the technical sessions that followed. The proceedings were structured to prioritize hands-on learning, with the resource person guiding students through various practical demonstrations.

Students engaged in interactive sessions where they explored the capabilities of LLMs and practiced prompt engineering. The flow of the event ensured that participants could apply theoretical knowledge immediately, resulting in a highly productive and engaging experience.

Information was not available in the provided WhatsApp conversation or uploaded documents.

The workshop saw active participation from AIML students. The hands-on nature of the event encouraged students to experiment with AI tools, ask questions, and collaborate on practical tasks, demonstrating a high level of engagement throughout the day.

Topics Covered

1. Fundamentals of Generative AI
2. Large Language Models (LLMs)
3. Prompt Engineering
4. AI-based applications

Schedule Summary

1. Information was not available in the provided WhatsApp conversation or uploaded documents.

Learning Outcomes

After attending the workshop, students were able to:

1. Enhanced understanding of the architecture and functionality of LLMs.
2. Proficiency in applying prompt engineering strategies for AI applications.
3. Practical experience in deploying AI-based solutions.

4. Increased awareness of current industry trends in Artificial Intelligence.

Key Highlights

1. Focus on hands-on learning.
2. Comprehensive coverage of the Generative AI ecosystem.
3. Active student participation.

Benefits

1. Students gained practical insights into emerging AI technologies.
2. The workshop encouraged students to explore innovative AI-based solutions.
3. Improved technical skill set relevant to current industry demands.

Conclusion

The workshop on Generative AI and Large Language Models was a successful initiative that provided students with valuable practical knowledge. It effectively highlighted the importance of staying updated with the rapidly evolving field of AI.

The department remains committed to organizing such events to ensure students are well-prepared for the challenges and opportunities in the AI domain.

AI Executive Summary

The Department of Artificial Intelligence & Machine Learning (AIML) at D. Y. Patil College of Engineering and Technology conducted a one-day workshop on 'Generative AI and Large Language Models' on August 8, 2026. The event focused on providing students with practical exposure to Generative AI, LLMs, and prompt engineering. Through hands-on demonstrations and interactive sessions, students gained valuable insights into the latest AI developments and learned how to apply these technologies to create innovative solutions. The workshop successfully bridged the gap between academic theory and industry practice, fostering a deeper understanding of AI's potential and preparing students for future professional challenges in the field.

Acknowledgement

The Department of AIML expresses its gratitude to the college management, the IQAC, and the Academic Cell for their support in organizing this workshop. We also thank the

students for their enthusiastic participation and commitment to learning.
