Executive Summary

The AICTE accreditation report for the 2025-2026 academic year reflects a total of three recorded institutional activities across six monitored modules. The data indicates a period of limited activity, with specific achievements noted in placements, student accomplishments, and faculty recognition. Notably, the Computer Engineering department accounts for two of the three total records, demonstrating a concentration of activity within this discipline. While the institution achieved growth in placements, student achievements, and faculty achievements compared to the previous period, there were no recorded activities in the areas of internships, publications, or patents for the 2025-2026 cycle. The institution successfully facilitated one placement with TCS, one technical student achievement, and one research-related faculty achievement. The absence of data in publications and patents, coupled with the decline in internship records, suggests a need for strategic focus on research output and industry-integrated learning opportunities to align with AICTE accreditation standards.

Key Highlights

- Total records: 3
- Placements: 1
- Student Achievements: 1
- Faculty Achievements: 1
- Internships: 0
- Publications: 0
- Patents: 0
- Top Department: Computer Engineering (2 records)
- Growth in Placements: 100%
- Growth in Student Achievements: 100%

Charts

Recommendations

- Implement a formal tracking mechanism to increase the volume of recorded internships.
- Develop an institutional policy to incentivize and document faculty research publications.
- Establish a dedicated cell to monitor and record patent filings and intellectual property activities.
- Expand student and faculty achievement tracking beyond the Computer Engineering department to ensure comprehensive institutional reporting.
- Conduct a review of the reporting workflow to ensure all academic activities are captured in the accreditation management system.

Appendix

Report Type: AICTE Report

Department: All Departments

AI Summary Source: gemini

Sections: cover, table-of-contents, executive-summary, key-highlights, charts, statistics, tables, images, recommendations, appendix

Institutional Strengths

- Successful placement of a student in TCS within the Computer Engineering department.
- Documented technical achievement by a student in the Computer Engineering department.
- Faculty recognition in the research category.
- Positive growth in placements, student achievements, and faculty achievements compared to the previous period.

Observations

- Total of 3 records across 6 modules.
- Zero records reported for internships, publications, and patents.
- Computer Engineering is the primary department contributing to institutional records.
- All recorded activities occurred between June 2025 and August 2025.
- Growth percentage for the overall reporting period is 0% due to the offset of gains and losses across modules.
