Executive Summary

The Student Activities Report for the 2025-2026 academic year indicates a total of two recorded activities across four monitored modules. Data analysis reveals that student engagement is currently concentrated within the Computer Engineering department, which accounts for all recorded achievements and placements during this period. Specifically, one student achievement in the technical category and one placement with TCS were documented. Notably, the modules for internships and completed event reports recorded zero activity for the 2025-2026 period, representing a decline compared to the previous reporting cycle. While the institution observed positive growth in the student achievements and placements modules, the overall institutional activity volume remains limited. The data suggests a need for increased administrative oversight and reporting consistency across all student activity modules to ensure comprehensive documentation of institutional performance.

Key Highlights

- Total records: 2
- Student Achievements: 1 record
- Placements: 1 record
- Internships: 0 records
- Completed Event Reports: 0 records
- Computer Engineering department contribution: 100% of total records
- Growth in Student Achievements: 100%
- Growth in Placements: 100%
- Internship growth: -100%
- Completed Event Reports growth: -100%

Charts

The following charts are rendered from aggregated institutional analytics data.

Technical

activityName	studentName	rollNumber	year	department	date
Hackathon Winner	pdf-report-test-Rahul	—	2025	Computer Engineering	15 Aug 2025

Placements

activityName	studentName	rollNumber	year	department	date
—	pdf-report-test-Rahul	—	2025	Computer Engineering	01 Jun 2025

Event Images

No event photographs were available for the selected report scope.

Recommendations

- Implement standardized reporting protocols to capture internship data and event outcomes.
- Investigate the cause of the decline in completed event reports to ensure all student-led initiatives are documented.
- Expand student activity tracking beyond the Computer Engineering department to capture institutional-wide engagement.
- Establish a centralized system for students to report internship completions to improve data accuracy.

Appendix

Report Type: Student Activities Report

Institutional Strengths

- Successful documentation of student technical achievements within the Computer Engineering department.
- Placement activity recorded for the 2025-2026 period with TCS.
- Positive period-over-period growth of 100% in both the student achievements and placements modules.

Observations

- Total institutional activity is limited to two records across four modules.
- All recorded activities are attributed to the Computer Engineering department.
- Internships and completed event reports recorded zero activity for the current period.
- There is a 100% decline in internship and event report documentation compared to the previous period.
- Activity is concentrated in the first quarter of the academic year (June and August 2025).
