Workshop Report on Generative AI and Prompt Engineering

Event Details :

Title of the Event:Generative AI and Prompt Engineering – From Concepts to Applications

Organized By: AI Innovation Hub & TechLearn Academy

Resource Person:Information was not available in the provided WhatsApp conversation or uploaded documents.

Head of Department:Information was not available in the provided WhatsApp conversation or uploaded documents.

Venue: Innovation Lab, Pune

Date: 31st July 2026

Time:Information was not available in the provided WhatsApp conversation or uploaded documents.

Participants: 1

Introduction

The workshop on 'Generative AI and Prompt Engineering' was organized to address the growing demand for expertise in artificial intelligence technologies. As Generative AI continues to reshape industries, it is imperative for students to gain hands-on experience with these tools.

The event provided a platform for students to explore the intersection of LLMs and practical application, ensuring that academic learning remains aligned with current industry trends.

Objectives

The objectives of the workshop were:

1. To provide practical exposure to Generative AI technologies.
2. To understand the architecture and functioning of Large Language Models (LLMs).

3. To master the art of prompt engineering for effective AI interaction.
 4. To explore responsible AI practices and ethical considerations.
-

Workshop Proceedings

The workshop commenced with an introduction to the current landscape of Generative AI. The session flow was designed to transition from foundational concepts to advanced prompt engineering techniques.

Participants engaged in interactive sessions where they explored the capabilities of various AI models. The delivery was highly practical, focusing on real-world use cases and iterative prompt refinement.

Information was not available in the provided WhatsApp conversation or uploaded documents.

Ms. Sneha More, a third-year student, demonstrated high levels of engagement throughout the workshop. Her active participation in hands-on activities and discussions reflects the department's commitment to fostering a culture of proactive learning.

Topics Covered

1. Generative AI Fundamentals
 2. Large Language Models (LLMs)
 3. Prompt Engineering Techniques
 4. Responsible AI Practices
 5. Real-world AI Applications
-

Schedule Summary

1. Information was not available in the provided WhatsApp conversation or uploaded documents.
-

Learning Outcomes

After attending the workshop, students were able to:

1. Proficiency in designing effective prompts for AI models.
 2. Enhanced understanding of the Generative AI ecosystem.
 3. Ability to integrate AI tools into academic and professional projects.
-

Key Highlights

1. Focus on hands-on learning.
 2. Exposure to industry-relevant AI tools.
 3. Emphasis on responsible and ethical AI usage.
-

Benefits

1. Improved technical skills in AI.
 2. Better preparation for industry-standard roles.
 3. Enhanced capability for academic research and projects.
-

Conclusion

The workshop successfully achieved its goal of introducing students to the practical aspects of Generative AI. The skills acquired are expected to have a long-term positive impact on the student's academic and professional journey.

The department will continue to support such initiatives to ensure students remain competitive in the evolving technological landscape.

AI Executive Summary

This workshop report details the participation of Ms. Sneha More in a technical training session on Generative AI and Prompt Engineering. Held on July 31, 2026, at the Innovation Lab, Pune, the event provided essential hands-on experience with Large Language Models and prompt engineering techniques. The workshop emphasized practical application, ethical AI usage, and industry-relevant skills, significantly contributing to the student's technical development. The department recognizes this as a valuable initiative for bridging the gap between theoretical knowledge and real-world AI implementation.

Acknowledgement

The department extends its gratitude to the AI Innovation Hub & TechLearn Academy for organizing this insightful workshop. We also appreciate the faculty and the student for their dedication to continuous learning.
