

Department of Artificial Intelligence & Machine Learning

Workshop Report on Generative AI and the Future of Intelligent Systems

Event Details :

Title of the Event: Guest Lecture on Generative AI and the Future of Intelligent Systems

Organized By: Department of Artificial Intelligence & Machine Learning

Resource Person: Mr. Karan Mehta, Senior AI Engineer, InnovateX Technologies Pvt. Ltd.

Head of Department: Information was not available in the provided WhatsApp conversation or uploaded documents.

Venue: Seminar Hall, [Institute Name]

Date: 6th August 2026

Time: 11:00 AM to 1:00 PM

Participants: Second and Third Year AIML students

Introduction

The Department of Artificial Intelligence & Machine Learning (AIML) organized a guest lecture to expose students to the latest advancements in AI technology. The event focused on the paradigm shift caused by Generative AI and its impact on future intelligent systems.

The lecture aimed to provide students with a comprehensive overview of the current AI industry landscape, ensuring they remain competitive and well-informed about emerging trends.

Objectives

The objectives of the workshop were:

1. Understand the core principles of Generative AI and LLMs.
2. Explore the potential of Agentic AI in modern applications.
3. Learn effective prompt engineering techniques.

4. Gain insights into industry-specific career opportunities.

Workshop Proceedings

The session began with a warm welcome to Mr. Karan Mehta. The speaker delivered a structured presentation covering the evolution of AI models. The flow of the session moved from theoretical foundations to practical industry applications, ensuring students could grasp complex concepts with ease. The interaction was highly productive, with students actively participating in the Q&A segment.

Mr. Karan Mehta is a Senior AI Engineer at InnovateX Technologies Pvt. Ltd. His expertise lies in the development and deployment of intelligent systems. His session was characterized by a blend of technical depth and practical industry wisdom, making it highly relevant for the student audience.

The session saw active participation from second and third-year AIML students. The students demonstrated keen interest by engaging in discussions and seeking clarification on advanced AI concepts, reflecting a high level of academic enthusiasm.

Topics Covered

1. Generative AI
 2. Large Language Models (LLMs)
 3. Agentic AI
 4. Prompt Engineering
 5. Real-world AI applications
 6. Career opportunities in AI
-

Schedule Summary

1. Information was not available in the provided WhatsApp conversation or uploaded documents.
-

Learning Outcomes

After attending the workshop, students were able to:

1. Enhanced understanding of Generative AI architectures.
2. Improved proficiency in prompt engineering.

3. Clearer understanding of the professional landscape in the AI sector.

Key Highlights

1. Expert session by a professional from InnovateX Technologies.
 2. Comprehensive coverage of Agentic AI.
 3. Interactive and engaging session format.
-

Benefits

1. Exposure to industry-standard AI practices.
 2. Networking opportunity with an experienced AI professional.
 3. Bridging the gap between academic theory and industry practice.
-

Conclusion

The guest lecture was a highly successful initiative that provided students with valuable insights into the future of AI. The department remains committed to organizing such events to foster a culture of continuous learning.

The event concluded with a vote of thanks, acknowledging the speaker's contribution to the students' professional development.

AI Executive Summary

This guest lecture, conducted by Mr. Karan Mehta of InnovateX Technologies, provided AIML students with a deep dive into Generative AI, LLMs, and Agentic AI. The session successfully bridged academic theory with industry practice, covering essential topics like prompt engineering and career pathways in the AI sector. The event was well-received, fostering significant student engagement and providing a clear perspective on the future of intelligent systems.

Acknowledgement

The department extends its sincere gratitude to Mr. Karan Mehta for his insightful session. We also thank the faculty and students for their active participation and support in making this event a success.
